Hi Mr. Snookal,

Sure, I've completed the letter and sent it to my Clinic Nurses to print out and mail to you.

Subject: Rotational Work in Nigeria

Dr. Khan,

I was the successful candidate for a position working in Nigeria on a 28 day rotational assignment (28 days on in Nigeria and 28 days off in the US). As part of the medical screen required for the position I told them about my Dilated Aortic Root and they requested a letter from my Cardiologist stating that it is 'Safe for me to work in Nigeria' with my condition and that 'everything is under control and no special treatments are needed'

Is this something you can provide?

Thanks

Mark
